EMCO WHEATON

TRUSTED MARKET LEADER FOR CHEMICAL LOADING ARMS

CHEMICAL LOADING / UNLOADING ARMS

We are a market-leading supplier of fluid transfer systems with over 100 years of experience in the field. We specialize in complex land and marine loading systems capable of handling a multitude of liquids and gases, **including chemicals and biofuels**. We offer solutions for top and bottom loading of single or multi-compartment trailer trucks and rail cars and virtually any other type of containers. Whether loading or unloading, ethanol, alcohol, sulfuric acid, sodium hydroxide, hydrochloric acid, oil, butane, propane, corn syrup or any other acid, base, solvent or any other liquid or gas product – we have a specific solution to handle each application safely and successfully.

HOW TO CHOOSE A CHEMICAL LOADING ARM?

Choosing the right loading arm for your business might not be easy but we're here to help! We use a wide range of materials such as carbon steel, aluminum, stainless steel and PTFE lining just to name a few. Our loading arms also come with vapor return lines and heating systems. This means that we've got you covered regardless of wheather you need to load various acids, tar sands, acetones, liquid sulfur or any other chemicals.

Contact us directly to get profesional guidance and an individual quotation!

WHY US?

MINIMUM PRODUCT LOSS

We design & manufacture our loading arms to be robust, reliable and eficient with the goal of maximizing our clients' profitability. This means that regardless of whatever chemical product you need to load – you can expect no leakages and minimum product loss. This translates to real savings for your business.

SAFETY

Our equipment is certified and compliant with the highest industry standards. This assures that your team members and your loading operations remain safe at all times.

DURABILITY

We use high quality materials chosen exactly for your desired application. This allows for increased longevity of the equipment and results in great cost reduction for your business. Regardless of the chemicals which are transferred via the loading arm. We also offer full and atractive range of aftermarket services!

FLEXIBILITY

We believe that each business is unique and thus has special needs. That's why we design our loading arms in close cooperation with our clients. This guarantees that the loading arms will be compliant with your individual business needs. Our special design process assures the increased efficiency of your loading operations!
